

## **Chemistry Lab Technician**

Covaron Advanced Materials is an award winning Startup Company. At our core is new application development: the process of creating value through innovative application of our materials to solve the real problems of our customers and the markets we serve. We are expanding our application development group with new team members that are excited and engaged in the collective purpose of making the world a better place through the power of materials.

Currently we are looking to hire a Chemist who will contribute to the research, development, and commercialization of our materials. We are grounded in a culture of active mentorship, respect, and transparency, which is fueled by the ingenuity of our world-class technical team. As a Chemist, you will be exposed to the large, eclectic, and constantly growing applications of our technology. The ideal candidate will enjoy the sense of knowing that every contribution they do makes a difference in the company.
